

Building Assets and Keeping Organized

John Papa

@john_papa | www.johnpapa.net

Look Ahead

Listing the many tasks

Establish a build folder

Compress images

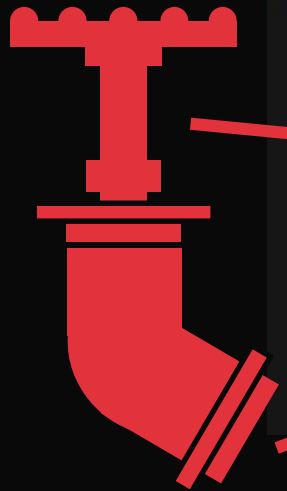

Copy fonts and images to a build folder

Task Listing and Default Tasks

List tasks

gulp-task-listing

default task allows us
to simply type gulp

```
gulp.task('fonts', ['clean-fonts'], function() {  
  log('Copying fonts');  
  return gulp.src(config.fonts)  
    .pipe(gulp.dest(config.build + 'fonts'));  
});
```

No plugin required

Copying

In the stream from a source

Out the stream to a destination

Compressing Images

- gulp-imagemin
- Compress images
- Adjust optimization levels
- Add plugins for additional image processing

<https://github.com/sindresorhus/gulp-imagemin>

Recap

gulp.src --> gulp.dest

gulp-task-listing

gulp-imagemin

Built-in copy, great for creating build folder

Default task in gulp to list all tasks

Image compression
