Automatic Browser Load (and Reload)

Already launching the server

We'll launch the browser too

Restart on server or client code changes

Must be fast

Time-Saving Browser Synchronization

BrowserSync

http://www.browsersync.io/

Inject file changes

Using sockets.io

Synchronize Actions Across Browsers

- Click

- Form

- Location

- Scroll

pluralsight

Keep All Browsers in Sync

browser-sync

```
browserSync({
    proxy: 'localhost:8181',
    port: 3000,
    files: ['./src/client/**/*'],
    ghostMode: {
        clicks: true,
        location: false,
        forms: true,
        scroll: true
    },
    injectChanges: true,
    reloadDelay: 1000
});
```

Recap

browser-sync	Automated browser synchronization
Injecting Files	Inject CSS, reload for JavaScript
Watches	Prepare code for injection
